

CPC FABRICATING INC.

Custom Metal Manufacturing Solutions

48 Bury Court
Brantford, ON N3S 0B1
(519) 658-9307
cpcfabricating.com
sales@cpcfabricating.com

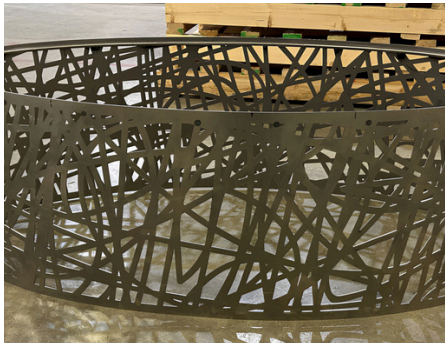

MATERIALS

Mild Steel • Stainless Steel • Aluminum • Copper • Brass • Titanium • Galvanized & Structural Steel

MANUFACTURING CAPABILITIES

Laser Cutting

- Fiber laser cutting up to 1/2" steel, stainless steel & aluminum
- Brass cutting up to 3/8"
- Complex profiles and precision components
- Standard sheet sizes up to 60" x 120"

Metal Forming

- CNC press brake forming and panel bending
- Material up to 3/8" thick
- Forming capabilities up to 12'
- Complex bends and formed sheet-metal components

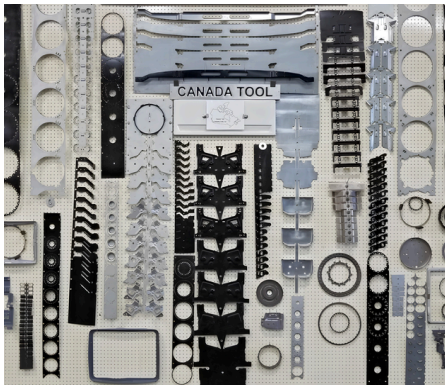

CNC Punching

- Sheet metal processing up to 1/4" thick
- Sheet sizes up to 60" x 120"
- Intricate shapes, patterns, holes and formed features
- Suitable for simple components and complex parts

Toolmaking & Stamping

- Tool & die design and manufacturing (progressive, line & draw dies)
- Jigs, fixtures & CNC machining
- 16 stamping presses with 160-400 ton capacity
- High-volume production stamping

Welding

- MIG, TIG, and laser welding
- AC/DC spot welding
- Stud and nut welding
- Welding of steel, stainless steel and aluminum
- Fabricated components and welded assemblies

Hardware Installation

- PEM hardware installation
- Inserts, studs, nuts and rivets
- Integrated hardware installation during production
- Supports finished components and assemblies

Assembly

- Mechanical & sub assemblies
- Hardware installation and integration
- Complete fabricated assemblies

Engineering Support

- DFM and manufacturability support
- Prototype development
- CAD/CAM design and programming
- Tooling and production engineering

Finishing & Surface Preparation

- High-capacity sandblasting
- Powder coating and integrated surface finishing coordination

INDUSTRIES SERVED

Construction • Automotive & Transport • Commercial • Agriculture • Manufacturing • Industrial Equipment • Aerospace
Food & Beverage Processing • Architecture • Electrical • Defence

70+ Years of Manufacturing Experience

Backed by **decades of manufacturing excellence**, we combine proven expertise in tooling, machining, stamping, and fabrication to deliver **reliable manufacturing solutions** for projects of every size.

ISO 9001:2015 & CWB Certified

Certified quality management systems and **CSA W47.1 & W47.2 certified welding processes** ensure consistent workmanship, traceability, and dependable results.

Complete Manufacturing Solution

From **engineering and tooling** to **fabrication, finishing, and assembly**, we manage every stage of production to simplify your supply chain and reduce the need for multiple suppliers.

HOW WE SUPPORT YOUR SUCCESS

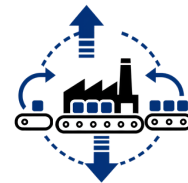

Collaborative Engineering Approach

We work alongside our customers to **improve manufacturability, solve production challenges**, and develop **cost-effective manufacturing solutions**.

Fast & Responsive Service

Local manufacturing, efficient production planning, and **responsive communication** help keep your projects moving and **minimize lead times**.

Prototype to Production

Whether you need a **single prototype**, **low-volume fabrication**, or **high-volume production**, we scale our manufacturing solutions to support every stage of your project.

Simplify your manufacturing process by partnering with a team that can support your project from **concept to completion**.
